

KrishiMitra – Pre-Claim Insurance Evidence Report

Reference ID: KM-1764849941 | Generated: 2025-12-04 17:35:50

1. Farmer & Farm Details

Field	Value
Farmer Name	Eeshan
Phone	+916366510823
Location	Bidar
Crop	Paddy
Farm Area	1.0 acre
Sowing Date	June 2025
Date of Damage	02-07-2025

2. Damage Assessment

Damage Type: Flood (Demo - detected from photos)

Severity: Medium

Description: Photos show waterlogging and crop damage. Visual analysis indicates significant loss to crop yield.

3. Evidence Summary

Photos Received: 3

Weather Data Match: Yes - Heavy rainfall recorded on this date supports flood damage possibility.

EXIF/GPS Consistency: Not available (downloaded from Twilio)

Confidence Level: Medium - Based on photos and available data

4. Financial Loss Estimate

Formula Breakdown:

A = Farm Area = 1.0 acre

Y = Expected Yield/Unit = 20 quintals/acre

P = Mandi Price/Unit = ₹2000/quintal

R = Recoverable % = 30%

Calculations:

Expected Yield = $1.0 \times 20 = 20.00$ quintals

Expected Revenue = $20.00 \times ₹2000 = ₹40,000$

Recoverable Yield = $20.00 \times 30\% = 6.00$ quintals

Recoverable Revenue = $6.00 \times ₹2000 = ₹12,000$

Estimated Loss = ₹28,000

Assumption: Since damage appears medium in photos, only 30% yield is considered recoverable.

5. Evidence Photos

6. Confidence & Limitations

☐☐ Important Notice:

This estimate is based on:

- Photos provided by farmer
- Farmer's input regarding location, crop, and dates
- Public data (weather, mandi prices, average yields)

This is NOT an official insurance approval.

Final decision on claim approval and compensation amount rests with authorized field officers and insurance company officials.

This report can be used as supporting evidence when filing your official claim at the agriculture/insurance office.
